

OSCAR CABRERA

Tampa, FL | 347-569-0105 | Oscar.Cabrera1112@gmail.com | Active Secret Clearance

[GitHub Page](#) | [Technical Publications](#)

PROFESSIONAL SUMMARY

Versatile IT professional with nearly five years of enterprise support experience and Active Secret clearance. Proven track record managing identity and access management (IAM) operations, user provisioning, and authentication systems across large-scale enterprise environments (10,000+ users). Hands-on experience implementing security controls and building SIEM-based threat detection labs to develop expertise in security operations, log analysis, and incident response.

CORE COMPETENCIES

Identity & Access Management (IAM): SailPoint IdentityIQ, Okta, Active Directory, Microsoft Entra ID, CyberArk, Multi-Factor Authentication (MFA), Least Privilege

SIEM & Security Operations: Splunk, Wazuh, Sysmon, Event Log Analysis, MITRE ATT&CK

Networking & Systems: Cisco Routing & Switching, VLANs, DNS, Windows Server, Linux (Ubuntu), Windows 10/11, Citrix Director, Microsoft Intune

Scripting & Automation: PowerShell, Bash, Python

CERTIFICATIONS

- CompTIA PenTest+
- CompTIA Security+
- CompTIA Network+
- ISC2 Certified in Cybersecurity (CC)
- Cisco Certified Network Associate (CCNA)
- Microsoft Azure Fundamentals (AZ-900)

PROFESSIONAL EXPERIENCE

Technical Support Specialist I – ServiceLink (Fidelity National Financial)

Mar 2024 – Present

- Administer identity governance and lifecycle management using SailPoint IdentityIQ (IIQ), authoring SOPs to standardize access provisioning and enforcing strict audit compliance for user entitlements.
- Execute identity management and authentication controls across Okta, Active Directory, and Microsoft Entra ID, configuring MFA, applying least-privilege principles, and activating PIM roles to secure access.
- Support enterprise identity controls across specialized business applications (Agent Trax, SmartView, EXOS), managing vendor accounts, distribution scopes, and privileged credential retrieval via CyberArk.
- Manage endpoint compliance and secure virtualized environments using Microsoft Intune and Citrix Director, verifying hardware compliance states and supervising isolated virtual desktop sessions.
- Resolve 20–30 daily identity, access, and security-related tickets through ServiceNow, maintaining thorough audit documentation to support enterprise operations for over 10,000 users.

Enterprise Help Desk Analyst – Duke Energy

Dec 2022 – Apr 2024

- Managed identity access requests and Active Directory group assignments utilizing the enterprise Business Automation Platform (BAP) and SailPoint IIQ, collaborating with IAM teams to validate and provision user access.
- Administered Active Directory to perform account unlocks, password resets, and security group validations for enterprise users across multiple domains.
- Provided technical support and access management for virtualized environments using Citrix Director, shadowing users, resetting profiles, and terminating unresponsive sessions.
- Troubleshoot secure remote access connectivity via Cisco AnyConnect VPN, collecting and analyzing logs to resolve complex networking issues and escalating to specialized engineering teams when necessary.
- Resolved a high volume of technical support and access-related tickets for a large-scale critical infrastructure organization, establishing a strong foundation in enterprise IT operations and access management.

Infantryman (11B) – Florida Army National Guard

Jun 2017 – Jun 2023

- Conducted risk assessments and enforced DoD security controls for physical and logical systems.

- Monitored access logs and intrusion detection systems, maintaining zero security incidents during deployment.
- Documented findings through tracked remediation to support compliance with military security standards.
- Access Control & Logistics Coordinator (COVID-19 Response): Oversaw secure access processes for medical personnel at statewide testing and vaccination sites using Azure Entra ID and Active Directory, configuring permissions in ServiceNow and monitoring activity with Splunk, ensuring uninterrupted access for over 200 staff while maintaining compliance with health-security regulations.

PROJECTS & PUBLICATIONS

Cybersecurity Labs (Continuous Self-Learning)

- SOC Monitoring & Threat Detection Lab: Built a hybrid security lab using Wazuh SIEM, Splunk Enterprise, and the Elastic Stack across Windows 11 and Ubuntu Server virtual machines in VMware.
- Designed endpoint telemetry collection by configuring Sysmon to capture detailed Windows events and used custom Python and Bash scripts to parse cross-platform logs.
- Conducted simulated threat hunting and log correlation to analyze security-related activity, identify anomalous behavior, and validate threat detection capabilities.
- SOC Analyst Training (Hack the Box Academy): Completed hands-on SOC Analyst training (Top 5%, 100+ labs), performing incident triage, threat hunting, and escalations using MITRE ATT&CK to investigate network traffic and endpoint activity.

Publications

- "Querying REST APIs for Threat Analysis" (Medium): Authored a technical tutorial demonstrating how to query REST APIs using Python to extract, parse, and analyze indicators of compromise (IOCs) for threat hunting.

EDUCATION

M.S., Cybersecurity & Information Assurance

Western Governors University (WGU), Remote | Jun 2026 – Present

B.S., IT Management (Cybersecurity Management)

St. Petersburg College, St. Petersburg, FL | Jan 2020 – Aug 2021
